Stories

While the paintings and sketches of creepy UFO characters in early America are GREAT, the stories that Mark Rogers has created around them are just as SPECTACULAR!! Enjoy the art and stories of all of Rogers BRILLIANT work!

While hiking through the forests of eastern Oregon back in the early 1900's, four friends stumbled upon the bizarre remains of what appeared to be a giant. They immediately sought out experts to verify their find, but when they returned to the sight, the remains were gone without a trace. However, all four witnesses experienced a super-human increase in their cognitive abilities and forged a deep bond that lasted for the rest of their long lives.
